

Go Incognito With Your Braces

Today's orthodontic treatment options go far beyond traditional metal braces. One option turns conventional treatment on its head. Incognito™ Orthodontic Braces are placed on the *back* side of your teeth, so they are completely hidden from view. No one will know that you are wearing braces unless you tell them.

Dr. Blaine Langberg is a certified Incognito™ provider. Incognito™ Orthodontic Braces are a good treatment option for most adults and adolescents who have all of their permanent teeth and prefer a more discreet method of treatment.

Incognito™ braces are made one patient at a time, one tooth at a time. They are 100% customized to follow the contours of your teeth for optimal comfort and performance. Dr. Langberg determines your unique prescription for custom-built braces so your teeth will move in the most efficient manner possible. The wires are bent to a precise shape with robotic technology to ensure that you get ideal results.

Why choose Incognito™ Orthodontic Braces?

- Completely aesthetic; no one will know that you are wearing braces
- Minimal discomfort and speech interference
- 100% customized for the best results
- Customized wires that do not require adjustments minimizing appointments and discomfort throughout treatment
- Quick results
